Scope: Release of emergency fixes

Modifications have been made to WIMS 1.2.0. The corrections will be applied to WIMS tonight - June 23, 2009 at 8:00 PM (MDT).

The following describes the fixes that have been applied to WIMS.

1. The address and navigation issues using the Fastpaths and Dashboard have been corrected. The user can now move between Fastpaths and the Dashboard without receiving errors or the Disclaimer popup box.
2. The Navigation Tree issues have been resolved for users using FireFox. The plus and/or minus boxes were not displaying. The issue is now corrected.
3. The Dashboard now displays buttons for 1 Day and PLST outputs.
4. The FastPath for Edit Point forecast has been fixed so the link works correctly from the FastPath box and the Navigation Tree.
5. Pocatello NWS is now an option in the Profile for the local weather service office choice.
